

CANCER RESEARCH UK

PUBLIC INVOLVEMENT IN RESEARCH
STEPHEN THOMAS

Public Patient Involvement in Research

What Public Patient Involvement is

Why it may be beneficial to researchers work

The range of ways that patients and carers can be engaged in research

How to identify and address practical issues associated with PPI

Cancer Research UK- The commitment.

“We are committed to finding new ways to work alongside our supporters and the public, making sure that every person who wants to join the fight can get involved”

Involvement coaches

Speaking
at events

Provide a
connection
between
other
organisations
work and
CRUK

Join up
engagement
and
involvement
in CRUK
Centres

Help staff
and
researchers
understand
PPI

Networking
and
promoting
events

Attending/
facilitating
workshops
and
meetings

Help the
public to
understand
the role of
PPI in
research

INVOLVEMENT

Being part of a Trial Steering Group
Advising on content of research trial
Contributing to policy

ENGAGEMENT

Being informed of developments
Being part of patient groups

PARTICIPATION

Being a subject of a trial
Contributing samples to bio banking

Don't take my word for it!

“Involving People believes that 'active' involvement of members of the public leads to research that is more **relevant**, more **reliable** and more likely **to be used** to improve health and social care services.”
